# History and Innovation

The story of ECHO begins with the first-ever manual duster created by the Kioritz Corporation of Japan in 1947. This evolved to the Kioritz Corporation of America establishing a presence in Northbrook, IL in 1972 as an importer of high-performance, 2-cycle handheld products from Japan. In 1978, we were officially established under ECHO Incorporated. Soon after, the focus shifted towards engineering and manufacturing in the U.S. with initial production and assembly operations in Wheeling, IL. In 1985, we established our present-day Americas' corporate headquarters and manufacturing facility in Lake Zurich, IL.

The outdoor power equipment industry is rapidly evolving. At ECHO, we always aim to develop new technology and product that enable people to do their best work.

We've historically pushed ourselves to be at the forefront, to be proactive, and to bring new ideas to market. Like when we created the world's first mini pro saw, the world's first backpack blower, the world's first handheld blower, and also the world's first low noise backpack blower. In 2021 we are introducing the PB-9010 - a backpack blower with even more power than models that have recently debuted from ECHO or any other manufacturer on the planet. The PB-9010 is unquestionably the most powerful backpack blower in the world!

Our approach to innovation is centered around power, light weight, and greater productivity delivering excellence to our customers through time and cost savings.

As we move into another year, we remain committed to innovation design and to producing the best products for you.

# BLADES AND CONVERSION KITS

A variety of brush and dense grass blades are available for all ECHO straight shaft (SRM series) trimmers and brushcutters. A blade conversion kit is required if not supplied with your original trimmer. Refer to your operator's manual for the appropriate safety harnesses, handles, shields, etc. when installing optional blades or accessories.

# POWER PRUNERS®

ECHO Power Pruners provide extra long reach for fast, easy and safe tree pruning while keeping your feet on the ground. Available in either fixed length or telescoping configurations, a Power Pruner can provide a reach of over 12 feet depending on the model (and even longer with optional extensions). The lightweight design and comfortable controls ensure maximum operator comfort. Heavy-duty gearboxes feature dual-sealed bearings and spiral cut steel gears for maximum lubrication, durability and cutting performance. An adjustable oiler delivers the right amount of oil, every time, for exceptional chain lubrication. The chain tensioning system improves cutting performance and extends bar and chain life. ECHO Power Pruners deliver commercial-grade performance and optimum tree care versatility.

# HEDGE TRIMMERS

For professionals who demand performance, ECHO hedge trimmers deliver and are available in single-sided and double-sided blade configurations, as well shafted models. ECHO hedge trimmers are tough, reliable and loaded with intelligent features like: a throttle lock-out to help prevent accidental blade engagement, commercial-grade gear cases and cutting blades for the heaviest applications, and vibration-reducing engine mounts and padded handles for operator comfort. Every hedge trimmer uses ECHO-exclusive RazorEdge® blades, which are laser cut and precision ground for long-lasting sharpness. Three sharpened edges per cutting tooth start cutting before the tooth engages, giving you the most efficient cut possible.

# PRO ATTACHMENT SERIES™

The ECHO Pro Attachment Series™ (PAS) is the perfect all-in-one solution. In a word, the system delivers versatility. The application flexibility of this expandable line-up is as limitless as your changing job requirements. When your job requires a change, a simple tool-less coupler makes changing to another tool quick and easy. The PAS system is also economical without having to purchase stand-alone, dedicated units or maintain multiple engines - all you need is one power head and a collection of attachments.

## PAS-225

### POWER HEAD

The best choice for many residential yard chores.

- Tool-less coupler allows for fast, easy changes on multiple attachments
- Adjustable left-handed grip for desired operator's hand position

# WHEELED TRIMMERS

If you have large areas that need mowing and a traditional lawn mower is not an option, ECHO's wheeled trimmers can handle the job. They have the power to cut through dense grass and weeds with 5x the power of a handheld trimmer. The maneuverability works great in places a mower just can't go – along raised flowerbeds, retaining walls, fences and trees. Each trimmer is equipped with .155" dia. ECHO Cross-Fire® line so it will make quick work of even the thickest grass and weeds.

## NEW WT-1610 WHEELED TRIMMER

# CHIPPER/SHREDDERS

A chipper/shredder is an extremely useful machine for reducing yard debris, like downed limbs or fallen leaves, into beneficial mulch. Two reversible chipping blades and eight reversible shredding knives quickly pulverize your yard debris into 3/4" pieces with the medium debris screen in place. Commercial landscapers can add chipping and shredding services to their customers for added value, while homeowners can save time and money by reusing the mulch to hold back weed growth and retain water around shrubs or flowers or to protect perennial plants over the winter.
